

Examiner's comment on "proxy in Internet" may not be correct.

3. Proxy function is forwarding printer's request to Web Server; and forwarding Web Server's data to printer. But the function of first server is translating number to URL of a document, and not receiving or forwarding any data from Web Server.

4. Diagrams 2B shows claim 6 in the network with proxy server

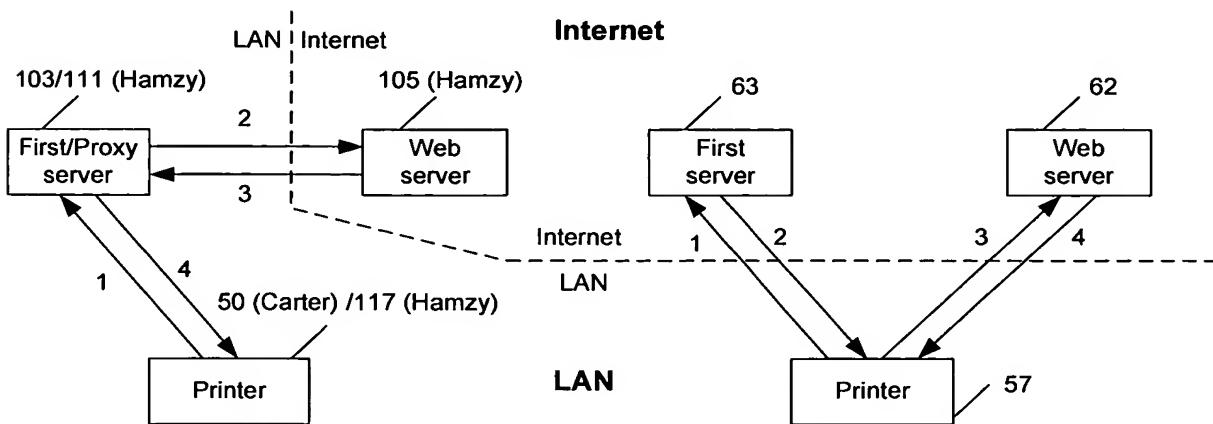

Diagram 1 - Carter in view of Hamzy

Diagram 2 – Claim 6

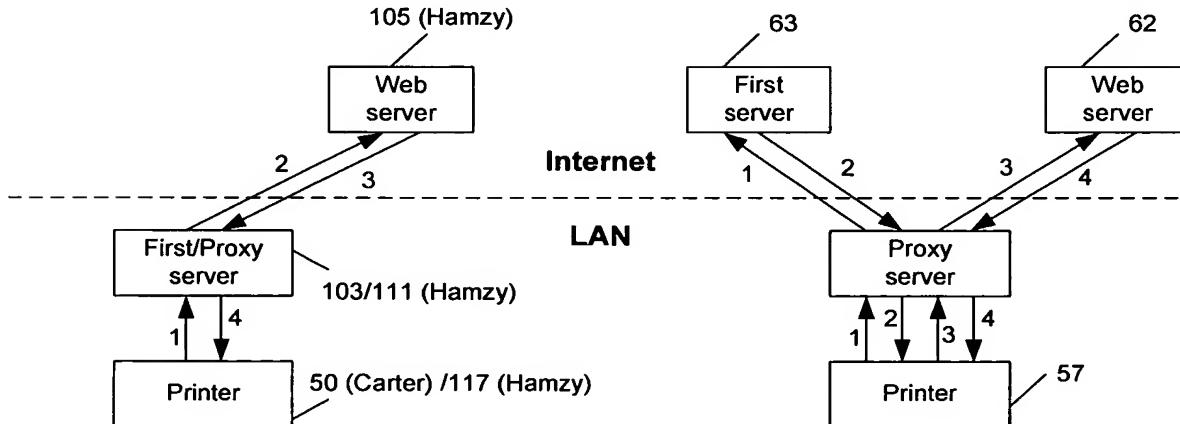

Diagram 1B - Carter in view of Hamzy

Diagram 2B – Claim 6 (show proxy)

Hence we request the Examiner to consider these obvious differences, and allow claims 6-8.

Respectfully submitted,

 Feng Lin (Applicant)
